

#### LM158, LM258, LM358

#### Low-power dual operational amplifiers

Datasheet - production data

#### **Features**

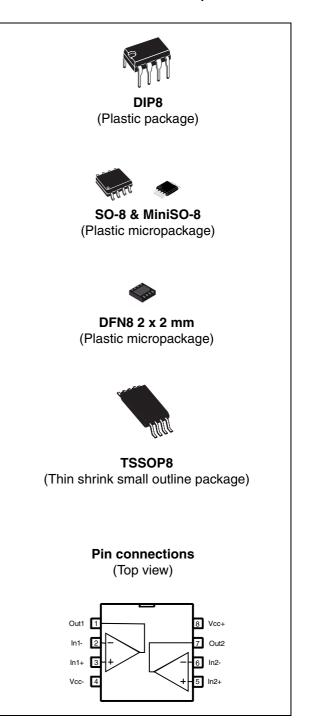

- Internally frequency-compensated
- Large DC voltage gain: 100 dB
- Wide bandwidth (unity gain): 1.1 MHz (temperature compensated)
- Very low supply current per operator essentially independent of supply voltage
- Low input bias current: 20 nA (temperature compensated)
- Low input offset voltage: 2 mV
- Low input offset current: 2 nA
- Input common-mode voltage range includes negative rails
- Differential input voltage range equal to the power supply voltage
- Large output voltage swing 0 V to (V<sub>CC</sub><sup>+</sup> -1.5 V)

#### **Description**

These circuits consist of two independent, highgain, internally frequency-compensated op-amps, specifically designed to operate from a single power supply over a wide range of voltages. The low-power supply drain is independent of the magnitude of the power supply voltage.

Application areas include transducer amplifiers, DC gain blocks and all the conventional op-amp circuits, which can now be more easily implemented in single power supply systems. For example, these circuits can be directly supplied with the standard +5 V, which is used in logic systems and will easily provide the required interface electronics with no additional power supply.

In linear mode, the input common-mode voltage range includes ground and the output voltage can also swing to ground, even though operated from only a single power supply voltage.

- 1. Short-circuits from the output to  $V_{CC}$  can cause excessive heating if  $V_{CC} > 15$  V. The maximum output current is approximately 40 mA independent of the magnitude of  $V_{CC}$ . Destructive dissipation can result from simultaneous short circuits on all amplifiers.
- 2. This input current only exists when the voltage at any of the input leads is driven negative. It is due to the collector-base junction of the input PNP transistor becoming forward-biased and thereby acting as input diode clamp. In addition to this diode action, there is NPN parasitic action on the IC chip. This transistor action can cause the output voltages of the Op-amps to go to the V<sub>CC</sub> voltage level (or to ground for a large overdrive) for the time during which an input is driven negative.
  This is not destructive and normal output is restored for input voltages above -0.3 V.
- 3. Short-circuits can cause excessive heating and destructive dissipation.  $R_{th}$  are typical values.
- 4. Human body model: a 100 pF capacitor is charged to the specified voltage, then discharged through a 1.5 k $\Omega$  resistor between two pins of the device. This is done for all couples of connected pin combinations while the other pins are floating.
- 5. Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5  $\Omega$ ). This is done for all couples of connected pin combinations while the other pins are floating.
- 6. Charged device model: all pins and the package are charged together to the specified voltage and then discharged directly to the ground through only one pin. This is done for all pins.

## 3 Operating conditions

Table 2. Operating conditions

| Symbol            | Parameter  | Value                                  | Unit |
|-------------------|--|--|------|
| V <sub>CC</sub>   | Supply voltage   | 3 to 30                                | V    |
| V <sub>icm</sub>  | Common mode input voltage range <sup>(1)</sup>         | $V_{CC}^{-}$ -0.3 to $V_{CC}^{+}$ -1.5 | V    |
| T <sub>oper</sub> | Operating free air temperature range LM158 LM258 LM358 | -55 to +125<br>-40 to +105<br>0 to +70 | °C   |

When used in comparator, the functionality is guaranteed as long as at least one input remains within the operating common mode voltage range.

<sup>1.</sup>  $V_0 = 1.4 \text{ V}$ ,  $R_S = 0 \Omega$ , 5 V <  $V_{CC}^+$  < 30 V, 0 <  $V_{ic}$  <  $V_{CC}^+$  - 1.5 V

<sup>2.</sup> The direction of the input current is out of the IC. This current is essentially constant, independent of the state of the output so there is no change in the load on the input lines.

The input common-mode voltage of either input signal voltage should not be allowed to go negative by more than 0.3 V.
 The upper end of the common-mode voltage range is V<sub>CC</sub><sup>+</sup> - 1.5 V, but either or both inputs can go to +32 V without damage.

<sup>4.</sup> Due to the proximity of external components, ensure that stray capacitance between these external parts does not cause coupling. Typically, this can be detected because this type of capacitance increases at higher frequencies.

Qualified and characterized according to AEC Q100 and Q003 or equivalent, advanced screening according to AEC Q001 & Q 002 or equivalent.

<sup>2.</sup> Qualification and characterization according to AEC Q100 and Q003 or equivalent, advanced screening according to AEC Q001 & Q 002 or equivalent are on-going.

# 8 Revision history

Table 10. Document revision history

| Date         | Revision  | Changes  |  |  |
|--------------|---|--|--|--|
| 01-Jul- 2003 | 1   | First release.   |  |  |
| 02-Jan-2005  | 2   | R <sub>thja</sub> and T <sub>j</sub> parameters added in AMR <i>Table 1 on page 3</i> .  |  |  |
| 01-Jul-2005  | 3   | ESD protection inserted in Table 1 on page 3.  |  |  |
| 05-Oct-2006  | 4   | Added Figure 17: Phase margin vs. capacitive load.   |  |  |
| 30-Nov-2006  | 5   | Added missing ordering information.  |  |  |
| 25-Apr-2007  | 6   | Removed LM158A, LM258A and LM358A from document title. Corrected error in MiniSO-8 package data. L1 is 0.004 inch. Added automotive grade order codes in Section 7 on page 19.   |  |  |
| 12-Feb-2008  | 7   | Corrected V <sub>CC</sub> max (30 V instead of 32 V) in operating conditions. Changed presentation of electrical characteristics table. Deleted V <sub>opp</sub> parameter in electrical characteristics table. Corrected miniSO-8 package information. Corrected temperature range for automotive grade order codes. Updated automotive grade footnotes in order codes table. |  |  |
| 26-Aug-2008  | 8   | Added limitations on input current in <i>Table 1: Absolute maximum ratings</i> .  Corrected title for <i>Figure 11</i> .  Added E and L1 parameters in <i>Table 5: SO-8 package mechanical data</i> .  Changed <i>Figure 30</i> .  |  |  |
| 02-Sep-2011  | 9   | In Chapter 6: Package information, added:  - DFN8 2 x 2 mm package mechanical drawing  - DFN8 2 x 2 mm recommended footprint  - DFN8 2 x 2 mm order codes.   |  |  |
| 06-Apr-2012  | -2012 Removed order codes <i>LM158YD</i> , <i>LM258AYD</i> , <i>LM258YD</i> and <i>LM358YD</i> from <i>Table 9: Order codes</i> . |  |  |  |

#### Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

UNLESS EXPRESSLY APPROVED IN WRITING BY TWO AUTHORIZED ST REPRESENTATIVES, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
